

Okay, so here are some spots we want to look at to see what from William's version we can copy-paste and then graft onto the tree, which here will be my [[dr_s_initial_foray | initial foray]] ...

I'm not putting these in any order:

- 1.) All the "add" stuff and the "progression" towards the end of [[will_draft_4 12 | William's first foray]] ... can go towards the end of my version ...
- 2.) Will wants to keep some of the metaphor/simile/and stuff ... that is at the start of his version ... I am thinking that this could go early on in my version ... or a quarter of the way through when I take Aristotle to task ...
- 3.) Parts of the big long paragraph on page 6 should get transferred over and grafted early on ...
- 4.) First full paragraph on page 8 and going on to page 9 should get moved over ... I'm thinking somewhere prior to my turn to the treatment of the phallus ...
- 5.) Also the last full paragraph on page 10 should get moved over as well ... perhaps somewhere before the treatment of the "and," which is where it occurs in William's initial draft ...
